Opinion

ABSTRACT

This resource guide supplements catalog information on graduate programs in Family Studies. It also aids students in formulating their own program evaluation criteria. The guide summarizes the prospects for university Family Studies departments. Frogram descriptions cover four points: size and resources; admissions and requirements; theoretical and professional crientation; and faculty names and professional interests. Student survey results for each of the 51 American and Canadian programs are tabulated. This guide indicates how to obtain further information cirectly from each school. (LJS)

INTRODUCTION

This booklet, intended for the use of students interested in graduate programs in families studies provides information on departments in nearly 50 universities in the United States and Canada. We have gathered facts and opinions from several different sources.

A detailed questionnaire was sent to the administrators of the various programs. Through their cooperation, we think we have obtained up-to-date materials on departmental size and resources, admissions and requirements, theoretical and professional orientation, faculty research and teaching interests. We have included a brief overview on the ranges of responses reported across schools. Hopefully, this will help you to make your own evaluations.

By tradition, this booklet has concentrated most heavily on student perspectives. In this third edition we have attempted to systematize both the questions asked and the sources for our respondents. Although we have lost some of the richness of detail that accompanies less structured descriptions, we hoped to provide you with a shared set of criteria to use in assessing these various and diverse programs.

We have provided a brief review of some of the trends noted in students opinions throughout all of the programs contacted. We did not attempt any further statistical analysis of the results, however. Because of the marked variations in response rates and the difficulty in assessing the representativeness of the sample, we preferred to present our results in the simplest and most straightforward fashion. These are summarized in Appendices A and C.

We hope you will appreciate the breadth of the areas covered in this edition. Questions were included on many issues which we suspected you might find difficult to ask while interviewing in a department. Students were asked to comment on the quality of student-faculty interaction, department morale, "busywork" on assistantships, desk space, job opportunities for spouses and much more.

Whether you view your graduate experience as a positive one can depend on diverse sorts of day-to-day matters. Hopefully, the persectives of insiders will help you anticipate problems on areas you should be sure to explore before accepting an offer.

How to Use This Booklet

Our intention was not only to provide you with up-to-date information. We felt that the issues which we've raised in our surveys would provide you with some insights into the ways in which students come to evaluate their own programs. As you narrow your choice of schools down, it is most important that you contact the programs directly: Our information was

gathered in the spring of 1975. Since then, many changes have taken place in many departments' offerings, resources, and requirements. What we provide is a preliminary guide through the many different types of programs in Family Studies.

We should also stress that inclusion in this volume does not imply approval by the National Council on Family Relations. Our aim is not to provide a formal evaluation of each program. Rather, we offer some background resource material to help you make your own assessments.

Our thanks to the many administrators and students who took the time to complete the questionnaire. Special thanks go to the Student Task Force of Graduate Programs which helped plan and construct the instrument and conduct the data analysis.

We wish you well in your search for an exciting program to meet your special needs. We welcome new members into the field of Family Studies. Be sure to keep your professional ties developing by joining us in the National Council on Family Relations Meetings. Our student membership is rising every year.

1973-75

Purpose

University catalogues are not riously out of date in descriptions of current departmental policies and regulations. Yet, the incoming student is often forced to make decisions on graduate programs on the basis of such incomplete information. In this section, we hope to offer some additional information which may help you to make a wise choice for graduate study. We intended to provide you with the most detailed and timely information available on Family Studies Programs in the United States and Canada. We hope this will allow you to make relative comparisons across programs. Bear in mind, however, that many changes in the economy have occurred since most schools replied last spring, 1975. As you narrow down your choices, you should be sure to check with program administrators personally, regarding the current situation.

Procedures

With the assistance of the National Council on Family Relations, fifty programs in the United States and Canada were identified as offering graduate training in Family Studies. For purposes of consistency, we limited our sample to programs actually containing the word "Family" in their title. As we note elsewhere, there are, of course, many other departments which offer majors or minors in the family area. Although they vary considerably in their perspectives, students of the family can be found in Departments of Sociology, Anthropology, Demography, Social Work, and Counseling Psychology. We have focussed our attention, then, on a relatively small portion of the possible programs of study.

We have included in our appendix the addresses of the fifty schools which were contacted. Despite the fact that they were surveyed at a particularly hectic time of year (spring 1975), most of the schools replied, thirty-seven in all. We should also note that we did hear from students at some of the schools in which we did not hear from administrators and vice versa, so you should check both sections.

We have also provided the original questionnaire in the appendix. The information reported here is a summary of a larger body of data. Although we could not include the answers to all of the questions, you might find the issues which we identified as helpful to you in preparing for an interview with a department.

An Overview of the Programs

Departments vary considerably in their size, resources, and academic goals, consequently generalizations are difficult to make. We will here, briefly summarize a few findings which may help you to compare the merits of one program against another.

Although departments as a whole ranged tremendously in size, it was important to note the actual number of faculty specializing in the Family Studies area. Most averaged about five but they varied from one to twenty. At large universities, there may also be many resources outside of your immediate department.

Programs also showed considerable differences in the faculty-student ratio. Some departments were currently supervising up to 100 students while others had less than twenty. Equally important, as a clue to the orientation of the department, is the relative distribution of students working for their Masters and their Ph.D.

The funding picture looked consistently gloomy in most of the schools reporting. Fellowships and traineeships were certainly the most difficult to come by, with an average of four reported as available in each program. Assistantships were somewhat more promising with a few departments reporting up to thirty-three different positions. The average, however, was about nine. The methods of calculating stipends were sufficiently complex that comparisons were nearly impossible to make. We would urge you to check on the number of hours involved per week, number of months available, possible tax waivers, tuition remissions and any additional fringe benefits granted to assistants.

The admission situation is a little more hopeful. On the average, more than half of those students applying to the various programs were ultimately accepted. Most of those admitted had a grade point average of 3.0 or better. We have provided Graduate Record Examination averages reported by the individual schools elsewhere. One additional promising note concerned the placement of graduates of the programs. Much to our surprise, given the state of the economy, the administrators reported that 95% of the students in both Masters and Doctoral programs had obtained appropriate positions upon completion of their training. We hope to see this trend continue.

Finally, we have included a list of faculty and their special interests for most of the departments. Many of the administrators pointed out that students often worked with faculty outside of the program as well. Remember that this has been a period of high educational turnover. Be sure to obtain up-to-date information before choosing a program on the basis of only one individual. Good luck!

STUDENT QUESTIONNAIRE PROSPECTS AND LIMITATIONS

Purpose

As noted in our introduction, we have become increasingly aware of the need of students for more information regarding graduate programs in family studies. Catalogs and course descriptions in themselves will tell you little about the morale of a program or the quality of faculty-student interaction. Even while visiting a department for an interview, you may not think to ask many of the questions which will only become important to you, once you've begun graduate training. How much work space, for instance, is provided for research assistants, or how many assignments appear to be mere "busy work?"

To help us anticipate the many issues that make the graduate school experience a good one or not, we spent many hours in conversations with students at all stages of professional progress--entering candidates straight out of high school up through veterans of qualifying exams and dissertation defenses. Our aim was to design questions on what you "ought" to know as well as the things you're sure you "want" to know.

We've tried to include student opinions on questions you might also be afraid to ask on an interview. How willing are faculty members to socialize with students informally; to loan their books; to accept feedback about their own performances? Do department members actively attend professional meetings and help finance student participation? How competitive or cooperative is the classroom situation? How regularly do graduate students keep in touch with each other? Many of these questions are related to the overall morale of a department -- something one can't always assess at first glance.

Finally, there are the important bread and butter issues. What is the fellowship situation like and how are the chances of successful placement in the job market after completion? We asked students to tell us about the. availability of reasonably-priced housing; childcare; transportation. If you're married you may also want to check on the availability of work for a nonstudent spouse. Our hope, is that the date on the particular schools you re considering will stimulate you to ask the questions once more of individuals in the program.

The Questionnaire Approach

When considering a new program you will hopefully have access to a wide variety of opinions and advice. In the past editions of Student Perspectives we have relied more heavily on a few descriptions written by students already pursuing degrees in the programs. This approach helped capture the flavor of the issues reported on at each school.

. The current edition of Student Perspectives has tried to systematize the the kind of information available on each school through a structured questionnaire. Although there is a richness of detail lost in the process, we felt it would

make comparisons across schools more reliable. Because we were also dealing with quantifiable data we hoped that future editions would be in a better position to assess changes in programs, and more confidently generalize about students in graduate Family Studies Programs.

Sampling Student Perspectives

Whose opinions did we solicit, and how many people responded? We began by identifying all of the programs in the United States and Canada which offered masters or doctoral degrees in departments with the word "Family" in the title. As we noted in the introduction, it is very important to realize that there are many additional programs in which you can purgue your interest in family studies. Most departments of sociology or anthrop logy include majors in the family area as do many clinical psychology programs. Schools of social work and home economics are also likely places. Since we did not receive replies from all of the Universities contacted, we have included our original mailing list so that you can contact these schools directly.

Likewise, student enrollment varies considerably in these various programs. We could not be sure about the numbers of people holding majors or minors in the family area. We sent an average of twenty questionnaires to students whom we had contacted through membership in the National Council on Family Relations. Through their cooperation, the questionnaire was distributed and returned to us for analysis. A total of nearly 1,000 forms were sent out to 50 different schools.

We received replies from thirty-seven programs and close to 300 students. The numbers and proportions of individuals replying from each school varied considerably. For this reason, you should compare the raw data presented in the appendix to the responses on the administrator's questionnaire concerning the number of students in the family studies program. This should help you to assess the representativeness of the information obtained from the students at the particular school you are interested in. You might also pay particular attention to the results on Section C of the questionnaire which provides you with some background information on the students who chose to reply. Our data suggests, for instance, that students differed in the nature of the criticisms they made depending on the length of time they had been in the program. Younger students, for example, voiced more concern over faculty aloofness. Older students more commonly reported problems relating to research resources of funding for meetings.

Results of Student Survey for Specific Schools

Because of the wide variations in numbers of respondents, and our concern with giving you an accurate picture, we chose to report our findings on each school in terms of raw frequencies, rather than with percentages. The data noted in the appendix summarize the numbers of individuals answering each question in the denominator and the frequency in each response category in the numerator. We felt that percentages might be misleading in some cases, so we are reporting to you in this fashion.

We will reiterate the importance of your asking many of these questions again when you interiew at the school of your choice. Although we have tried to present up-to-date information from representative sources, the economy is having a dramatic effect on many programs. We recommend that you use these findings as a preliminary diagnostic—a tool for anticipating possible problem areas that you ought to find out more about.

Student Perspectives in General

As a way of helping you to compare the results of the specific schools which you are interested in, we will briefly summarize here some of the generalizations we can make on student attitudes across all programs. Again, it is important to bear in mind that we are talking about a wide variety of departments with varying goals and perspectives.

<u>Mørale</u>

Most of the Family Studies students who replied to our questionnaire appeared to be satisfied with the most in their departments. Only 20% felt that most of the graduate students of the dissatisfied, while about 70% fell in the basically satisfied condition what sort of things served to heighten or lower students morale? To maswer this question we divided our respondents into two groups, relatively high and low in morale and looked at the answers to several other items on our questionnaire.

Students who reported a department low in morale were also more likely to complain about the quality of student-faculty interaction; lack of encouragement to attend professional meetings; inadequate work space; poor library holdings; discouraging job prospects; low financial assistance; limited field work opportunities; assistantships requiring a lot of "busywork." The majority of our female respondents fell into the low morale category while the males fell in the high morale category. Sex proved to be a more important variable in this regard than length of graduate study; grade point average; or type of program. In investigating prospective departments, you might bear these particular issues in mind.

Table 1. Morale of Department by Sex (Item #12)

•		- 0) 501	(ICCM MIZ)		
	<u>Male</u> 50	•	Female 75		
High Morale	62.5%	. 1	41.9%		
	19.3%		29.0	•	· Ken
Low Morale	30 .		-104	•	•
•	37.5%		58.1%		•
	11.6%		40.2%		f
Chi Square = 8.59002		with 1	d.f. Signi	ficance	+ .0034

It is encouraging to note that most of the students who replied tended to describe their programs favorably. Since our questionnaire provided ample opportunity to criticize programs, we suspect that this was probably reflecting a general attitude and not a selective response set in our particular sample. Most of the students reported that they had good student-faculty interaction both in and outside of class. They felt that their departments had an interdisciplinary approach.

In general, students were encouraged to participate in professional activities but few reported having adequate financial resources for attending meetings. Work space was also less of an issue than we anticipated. Most students had desk space and access to journals and library materials which they felt were adequate. Relations with other students was more often reported to be cooperative and noncompetitive, all signs of a positive educational experience.

Job prospects were somewhat less hopeful. Doctoral candidates were generally anticipating higher chances of successful job placements after graduation than were master's candidates. On the average, both groups fell into the moderately hopeful categories.

Financial assistance varied considerably from one program to another. Although most programs reported that students could anticipate an average of four to six semesters of support, few anticipated receiving assistance throughout their entire training. Since the time of our original survey, cutbacks have become increasingly severe, and unpredictable. This area in particular may be an important issue for you to look into when considering new programs.

We asked quite a few questions concerning available community resources for spouses and children. The situation in this area is not all encouraging. Although student housing was available to most students, employment for spouses was more difficult to come by. The majority of the respondents suggested that jobs, while they were available, were quite competitive. Babysitters seemed easier to come by than mass transit transportation. If you're trying to anticipate a budget you should look into both of these areas as we found a wide range of answers on these lights.

Assistantships

One important issue which you should be sure to investigate, is the availability of funds for research and teaching assistantships. Not only are these positions important sources of financial support, but they can also potentially provide stimulating and rewarding educational experiences. The funds for these positions come from both the university and from faculty research grants. For this reason, it is important for you to find out the extent to which these opportunities will be made available to students in a program.

We were also interested in learning the extent to which assistantships provided meaningful learning experiences to students. Our respondents were roughly divided between research and teaching assistants. Among both groups,

the majority reported the experience as a positive one. About one-third reported that all of their responsibilities were valuable to them; another 50% found it of moderate value; the remaining quarter found it weighted towards "busywork" with little redeeming educational value. In response to item number 32, close to 80% of our respondents indicated that their assistantship provided a stimulating learning experience for them.

Students also seemed to be fairly satisfied with the types of feedback that was provided to them in the performance of their work. The majority reported that they had some sort of organized supervision which provided them with adequate evaluations. Most in turn also had the opportunity to provide suggestions to their supervisors concerning their own performances. It would appear from our data that research and teaching assistantships are generally a positive learning experience for most graduate students. You may want to check into the availability of such opportunities and talk with students in the program concerning the role such positions are felt to play in graduate training.

Backgrounds of our Respondents

As we have indicated, the programs offering degrees in Family Studies vary tremendously in goals and orientations. One thing they share in common are high standards of admission. If the Graduate Record scores of our respondents are any indication, it would appear that a score of 500 or above is generally advisable on both the verbal and math sections of the exam. Only one-quarter fell below that level on the verbal and a third on the quantitative.

Our sample was about equally divided between students in programs leading to a Masters or a Ph.D. Nearly half had been in their program for a year and the remainder had been working on their degrees for nearly three years. Three-quarters of our respondents were still in their 20's and twice as many were married as were single. We heard from a much larger percentage of females-more than double the number of males, which may reflect the general sex composition of the area. We urge you to bear these statistics in mind while reviewing schools of interest.

Summary

Family Studies is a diverse area, culling students and faculty from a wide variety of fields. In turn, job opportunities in the area range from the academic to the applied with many new and exciting areas being developed daily.

In choosing the graduate program which you feel will be best for you, we hope you will attend to both the "bread and butter issues" and the more philosophical questions. In assessing the quality and desirability of a program, you will need to know about ecomomic resources, theoretical orientations, morale; community facilities; and national standing. We hope we have provided you with some preliminary information and some ideas on the important questions you should be looking into.

whe close by reiterating the importance of your gleaning up-to-date information at the time of your application. Come prepared for your interviews with lists of questions. Ask to be introduced to graduate students already in the program and ask their advice on issues you are concerned about. Remember that many schools will be assigning assistantships before you arrive on campus. You should arrange to meet faculty members who share your interests while you are visiting, in hopes of lining up an exciting assistantship for your first year. Don't be afraid to ask questions! Not only do people expect it—but it communicates your own seriousness and commitment to finding the right program for yourself.

We hope you've found our survey helpful. Please remember that participation in professional organizations while students can be an important experience. Keep in touch with the National Council on Family Relations—its meetings and publications and you'll have a better idea of what's happening in your field.

NCFR PROGRAM DESCRIPTION QUESTIONNAIRE Percentage Responses for Entire Sample

Form B: Student Form

The purpose of this questionnaire is to develop a body of information useful to individuals who are considering graduate programs in the family studies area, such as Marriage and Family Counseling, Family Life and Family Life Education. The following questions have been designed to accurately describe the student's personal, candid, evaluation of his/her graduate program in family studies. .. Use the answer sheet to record your responses to the first part of the questionnaire. (Also please note the name of the school on the Answer Sheet.) If you have any questions see your campus NCFR Student Representative or call Dr. Charles R. Figley, CDFL, Purdue University, 317-494-1351.

      (if none skip to Question #19)
18. To what degree are the clinical or counseling experiences which are available to graduate
      students primarily restricted to interactions with a university populace? (Staff, faculty;
      students and their families)
     a. totally university people b. mainly university people
                                                                      c. mixture of university and
     non-university _ d. mainly non-university
                                                   e. totally non-university
19. What is the maximum number of terms or semesters you, can expect to get financial assistance from
     your department?
                 23
                                                                                                                   204
20. On the average, how much course work is taken outside of family studies during the completion of
     course work (include research, methods, statistics, etc.)?
                                                     b. some, a few courses outside family studies.
     a. hone, all courses inside family studies
                                                                                                                   259
     \phi quite a few courses--about half inside family, half outside family studies 36 d. more than 14
     half oditside family studies e. nearly all outside family studies
21. How available to you are applied professional training experiences outside the university?
                                                                                                                 #232 ·
     a. readily available with many students participating
                                                               b. readily availab . but few students
                    c. not readily available; students are frustrated in their attempts to gain such 37 d. not readily available; student interests lie elsewhere 08 e. other--please
     experience .
     specify on reverse side of answer sheet 08
22. To your knowledge, what is the availability of reasonably-priced student housing?
                                                                                b. adequate availability
                                                                                                                  .241
     a. good availability of housing for both single and married students
     for married/unmarried students because of university/college provision
                                                                                 c. good availability07
     for single students only d, any housing is difficult to find 21 e, other--please specify on
     reverse side of answer sheet 05
23. What is the availability of work for a non-student spouse?
                                                                                                                  235
     a. very poor, a lost caus b. fair, but very limited
                                                                c. average, opportunities, but
     competitive d. good, quite a few opportunities

    e. excellent, wide range of positions

    What is the availability of reasonably-priced, good child care? How about child care centers?
                                                                          · 29.
                                                                                                                  213
               or, high costs or scarce sitters b. fair medium costs or a few reliable sources of c. average, costs ok and reliable sitters d. good, costs reasonable e. excellent, 05
       very poor, high costs or scarce sitters
     low costs and abundant sitters
25. Generally how available is mass transit transportation (bus, train, air)?
                                                                                                                  252
     a. poor, generally unavailable, b. fair, sporadically available c. average, available if
    you want to make the effort . d. good, usually available
                                                                    e. excellent, conveniently and
     reliably available
    How many of your fellow graduate students do you interact with frequently?
```

c, about half of the fig f d. most of them

b. a few of them

a. none at all

262

e. all of them

APPENDIX B

RAW DATA RESULTS OF FORM B (STUDENT FORM), NCFR PROGRAM DESCRIPTION QUESTIONNAIRE

The purpose of this questionnaire was to develop a body of information useful to individuals who are considering graduate programs in the family studies area, such as Marriage and Family Counseling, Family Life and Family Life Education. The following questions have been designed to accurately describe the student's personal candid evaluation of his/her graduate program in family studies. No attempt is made to report the results in summary form, each reader may draw his own conclusion regarding the relative advantages and disadvantages of each program based on student opinions.

KEY: Responses are found to the right of each question and alternative answer (usually a through e). Each of the students' answers in each University are listed by row. The numerator of the fraction represents the number of students who chose that particular response and the demominator represents the total number of respondents who answered the question. Thus, "3/6" means that half of the students from a particular family studies program selected a particular alternative answer, compared to other alternatives.

- How would you rate the quality of the student-faculty interaction (i.e., general working relations) in your department?
 a. poor b. fair c. average d. good e. excellent
- 2. In your view how much time does the average faculty member devote to student-faculty interaction (other than in the classroom)?

 a. initiates no outside class interaction at all b. initiates almost none
 c. initiates a little sporadically d. initiates quite a lot e. initiates regular and frequent interaction.
- 3. To what degree do the faculty members that you study with espouse a multi-disciplinary approach to education (as shown in teaching and research approaches)?

 a. no commitment b. little commitment c. some commitment d. Strong commitment e. complete commitment.
- 4. In your opinion what is the academic affiliation of the largest percentage of the faculty or Education b. Sociology c. Anthropology d. Home Economics e. other (please specify on back of questionnaire)
- 5. To what degree have you been encouraged to attend professional conventions by some individual faculty person or by the faculty at large?

 a. discouraged b. no encouragement c. moderately encouraged de strongly encouraged
- 6. Does your program help organize student attendance at conventions?

 a. yes b. no
- 7. How much money is, on the average, available for each student for a given academic year for professional travel?

 a. none b. less than \$50 c. \$50-\$100 d. over \$100 e. can't estimate
- 9. Is a greater effort made to finance a student's trip to a convention if he/she is presenting a paper?

 a. yes b. no
- 9. Work space at a university is very important. How many graduate students are given space which includes a desk for their own use?

 a. none b. a few c. some T.A.'s and R.A.'s d. all T.A.'s and R.A.'s e. all graduate students
- 10. How would you rank the professional library in the area of family studies at your university?

 a. poor b. fair c. average d. good e. excellent
- 2. How would you describe the general morale of graduate student in your department? a. poor, very dissatisfied b. fair, basically unsatisfied c. average, some gripes; some satisfied d. good, most basically satisfied e. excellent, highly enthusiastic and satisfied

- 13. How ald you rate the general "competitiveness" of your fellow students?

 a. cooperative and non-competitive b. slightly competitive c. competitive
 d. very competitive
- 14. What do you feel are your chances of successful placement in the job market upon completion of a master's program (e.g., in the specific job you are trained for)?
 - a. poor, no chance at all fair, a little chance c. average, moderately hopeful d. good, very hopeful e. excellent, fairly sure about opportunities
- 15. What do you feel are your chances of successful placement in the job market upon completion of a doctoral program?

 a. poor, no chance at all .b. fair, some chance c. average; moderately hopeful
 - d. good, very hopeful e. excellent, fairly sure about opportunities
- 16. What percentage of graduate students who have fellowships or assistantships are generally expected to get teaching experience of some type prior to graduation? a none b. it's up to the individual student c. about half id. most e. all
- 17. How would you rate your department's clinical or counseling facilities?

 a. Soor b. fair c. average d. good e. excellent f. none available/or can't ...
 judge (if none skip to question #19)
- To what degree are the clinical or counseling experiences which are available to graduate students primarily restricted to interactions with a university populace? (Staff, faculty, students and their families)

 a. totally university people b. mainly university people c. mixture of university and non-university d. mainly non-university e. totally non-university
- 19. What is the maximum number of terms or semesters you can expect to get financial assistance from your department?

 a. 1-2 b. 3-4 c. 5-6 d. 7-8 e. 9 or more
- 20. On the average, how much course work is taken outside of family studies during the completion of course work (include research, methods, statistics, etc.)?

 a. none, all courses inside family studies b. some, a few courses outside family studies c. quite a few courses—about half inside family, half outside family studies d. more than half outside family studies e. nearly all outside family studies.
- 21. How available to you are applied professional training experiences outside the university?

 a. readily available with many students participating, b. readily available, but few students participate c. not readily available; students are frustrated in their attempts to gain such experience d. not readily available; students interests lie elsewhere e, other--please specify on reverse side of answer sheet
- 22. To your knowledge, what is the availability of reasonably-priced student housing a good availability of housing for both single and married students in an interpretability for married/unmarried students because of university/college revision c. good availability for single students only d. any housing is difficult to find e. other--please specify on reverse side of answer sheet

ERIC Full Text Provided by ERIC

- 23. What is the availability of work for a non-student spouse?

 a. very poor, a lost cause b. fair, but very limited c. average, opportunities but competitive d. good, quite a few opportunities e. excellent, wide, range of positions
- 24. What is the availability of reasonably-priced, good child care? How about child care centers?
 a. very poor, high costs or scarce sitters b. fair, medium costs or a few reliable sources of sitters c. average, costs ok and reliable sitters d. good, costs reasonable e. excellent, low costs and abundant sitters
- 25. Generally how available is mass transit transportation (bus train, air)?

 a. poor, generally unavailable, b. fair, sporadically available c. average,
 available if you want to make the effort d. good, usually available e. excellent,
 conveniently and reliably available
- 26. How many of your fellow graduate lents do you interact with frequently?

 a. none at all b. a few of them about half of them d. most of them

 , e. all of them
- 27. What degree of access do you have to books and journals which belong to faculty members?

 a. none what some no sharing b. fair, limited sharing c. average--moderate reciprocity to good--much sharing of material e. excellent--wide and entity sharing
- 29. Indicate the type of assistantship you are presently receiving.

 a. research *b. teaching c. other (please specify on back of answer sheet):
- 30. How much of your assistantship time is spent performing "busywork" or tasks that have little redeemable educational value?

 "and one, all work is valuable to me b. a little, some of the work isn't valuable to me c. about half and half d. most of it is not valuable e. all of it is not valuable
- 31. Does your assistantship demand more work hours than you contracted for?

 a. was, a great deal more b. yes, a slight bit more c. probably about what
 expected d. no, a slight bit less e. no, a great deal less
- 32. Indicate the degree to which your assistantship duties provide stimulating and/or pertinent learning experiences for you.

 a. extremely stimulating b. moderately stimulating c. occasionally stimulating d. rarely stimulating e. never stimulating
- 33. What type, of feedback do you receive regarding your assistantship performance?

 a. no feedback at all b. a little informal feedback c. pass/fail credit

 d. formally graded evaluation e. highly detailed feedback from supervisor

- 34. Do you receive formal or informal hlep or instruction in your assistantship tasks?

 a. very strictly supervise isted b. moderately supervised or assisted c. sporadically advised or assisted d. hardly ever advised or assisted e. never advised or assisted
- 35. How often do you wish you had this type of feedback?

 a. very frequently b. somewhat frequently c. amount of feedback ok d. rather infrequently e. very infrequently
- 36. Does the opportunity exist for you as an assistant to provide your supervisor with feedback regarding his/her performance?

 a. no feedback at all b. a little informal feedback c. feedback neither encouraged nor discouraged d. sporadic feedback encouraged e. highly detailed feedback encouraged regularly
- '37. If required to take the Graduate Record Examinations, what was your score on the verbal section? (Leave blank if not taken)

 a. below 400 b. 400-500 c. 501-600 d. 601-700 e. above 700
- 38. If required to take Graduate Record Examinations, what was your score on the quantitative section? (Leave blank if not taken)
 a. below 400 b. 400-500 c. 501-600 d. 601-700 e. above 700
- 39. I am presently working on a:

 a. M.S. b. M.A. c. M.Ed. d. Ed.D. e. Ph.D.
- 40. Approximately how long have you been in graduate school working on your present degree?

 a. one semester (one-two quarters) b. two semesters (three quarters) c. three semesters (four-five quarters) d. four-five semesters (six-seven quarters)

 e. six or more semesters (eight or more quarters)
- 41. How long have you been in a family program working on your present degree?

 a. one semester (one-two quarters) b. two semesters (three quarters) c. three semesters (four-five quarters) d. four-five semesters (six-seven arters)

 e. six or more semesters (eight or more quarters)
- 42. What is your age?

 a. 22 or fewer years b. 23-24 c. 25-27 d. 28-33 e. 34 or more years
- 43. What sex are you?
 a. male b. female
- 44. What is your marital status?

 a. single b. married c. divorced or separated d. widowed
